

REPORT ESERCIZIO RETE SU CISCO

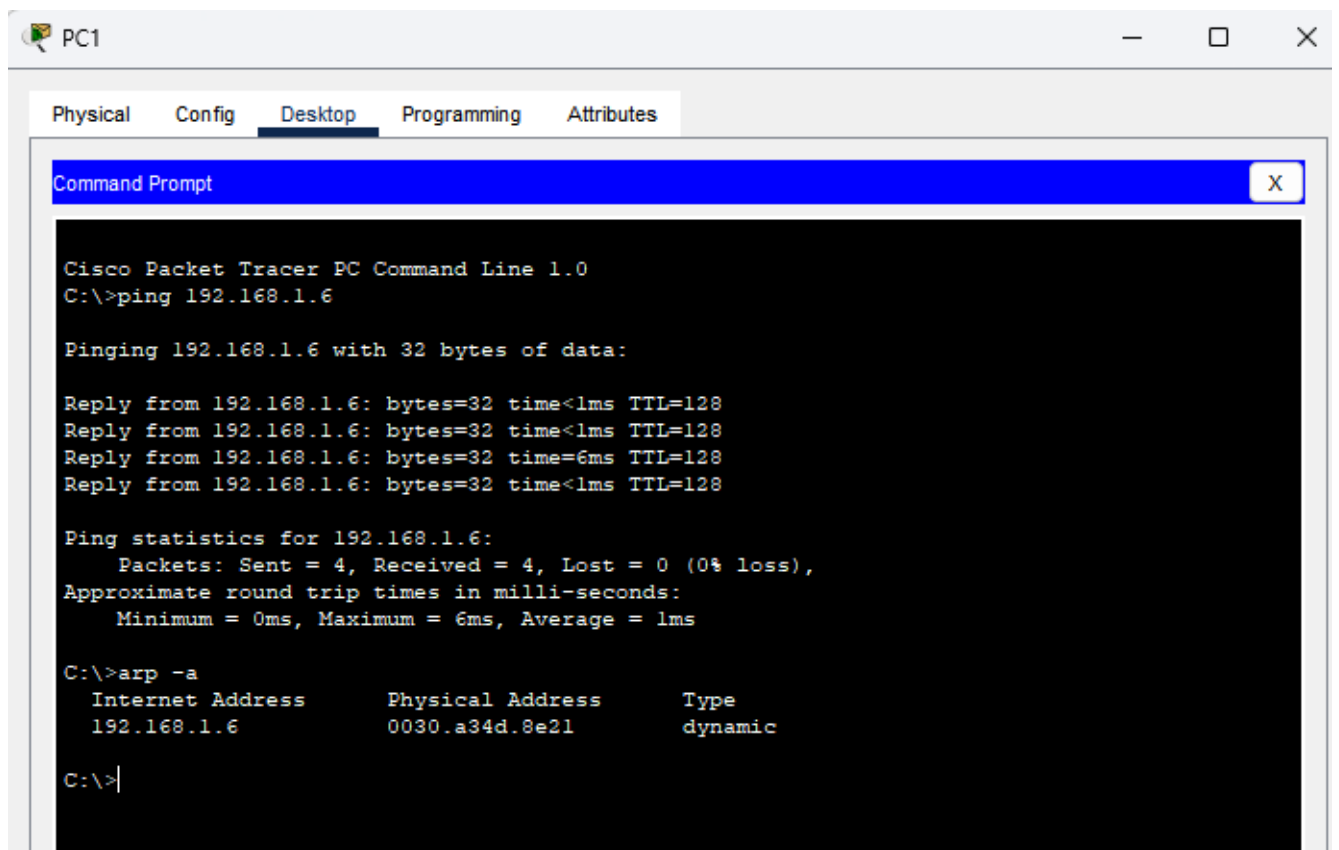

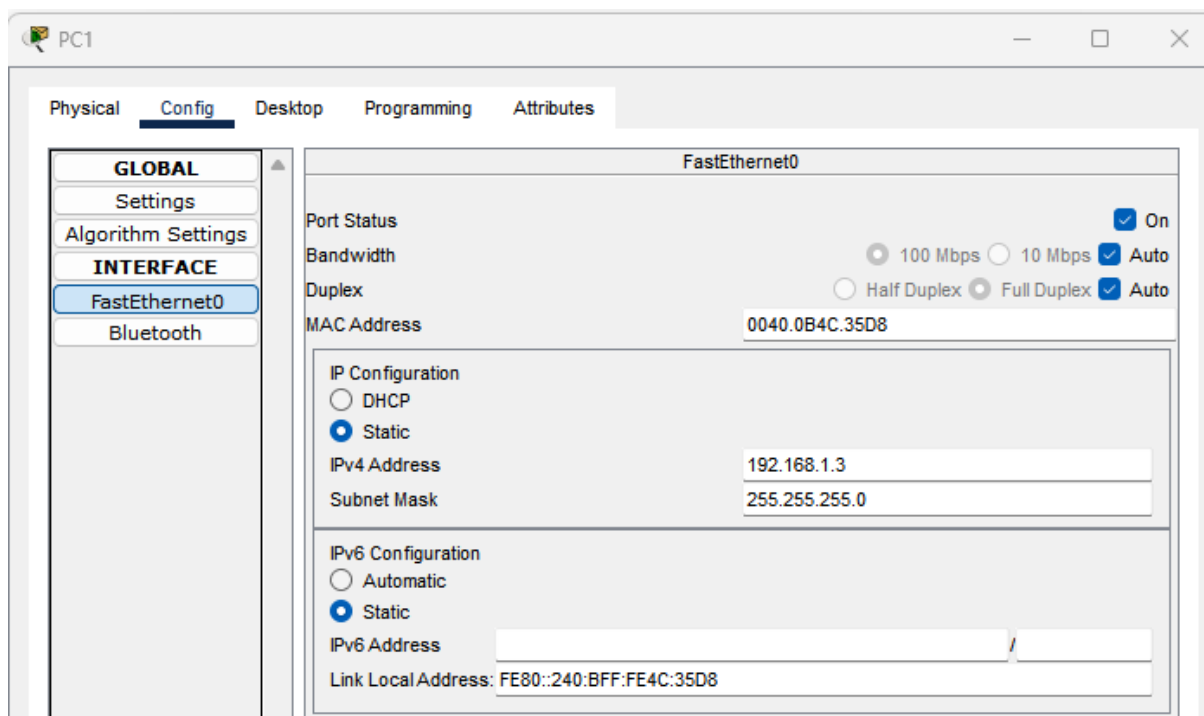

Si comincia con il creare la rete con i 6 pc suddivisi in 2 gruppi da 3 collegati da 2 switch.

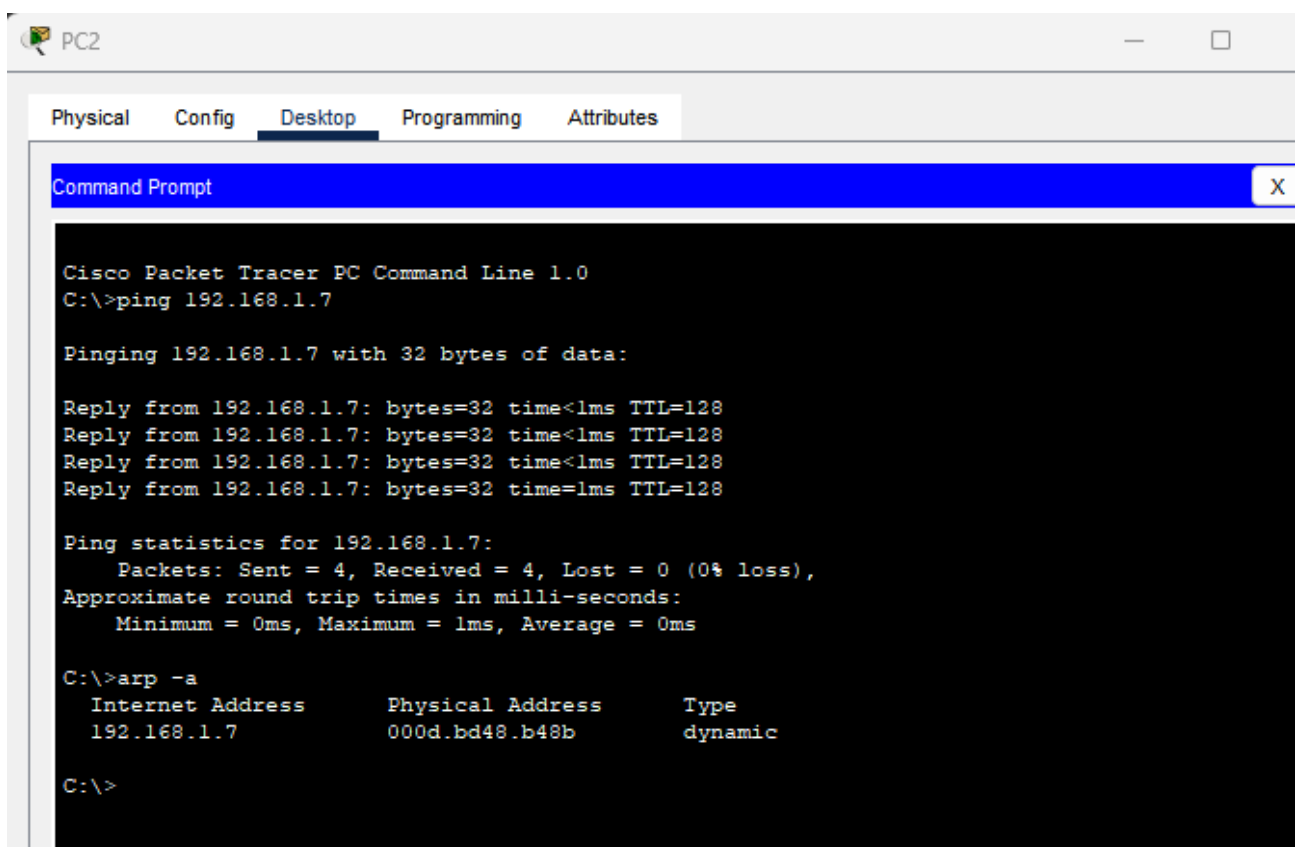

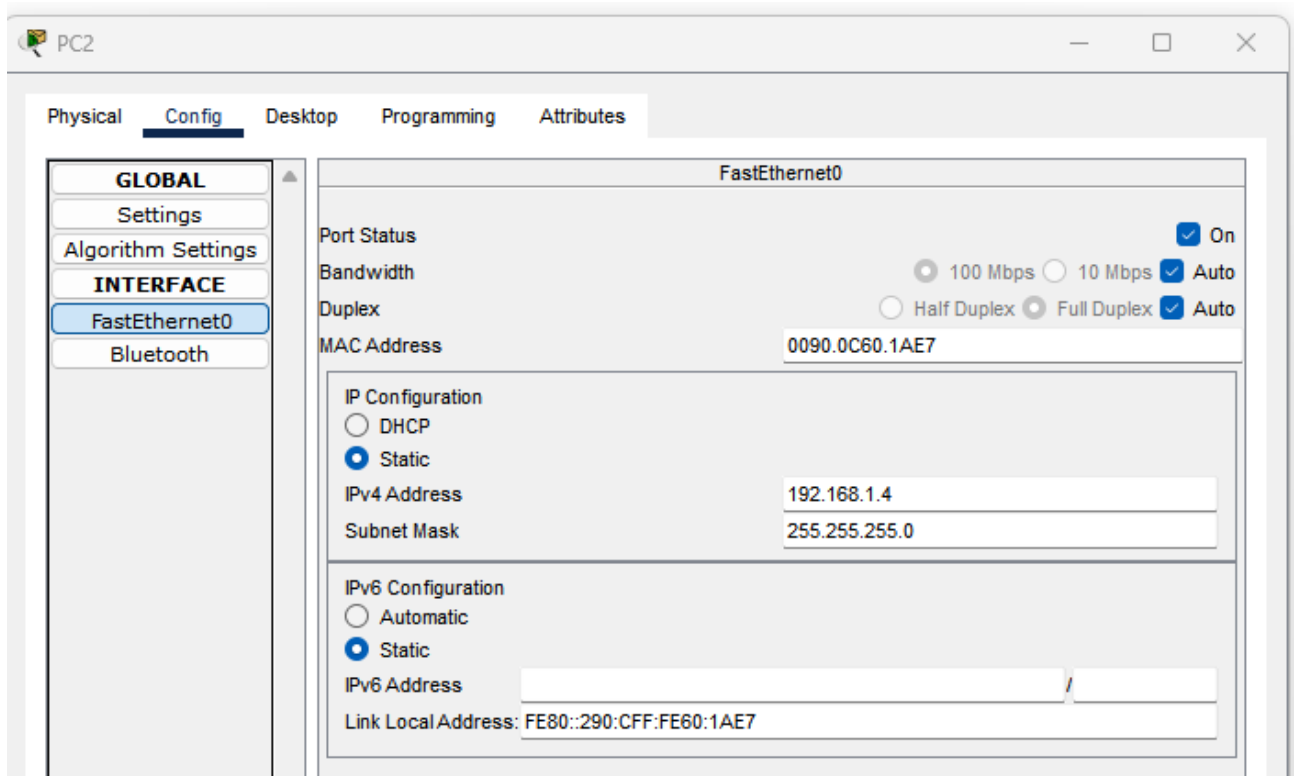

Una volta configurati i dispositivi si utilizza il comando “Ping” con l’indirizzo IP del pc a cui si vuole mandare il pacchetto.

Ping tra 192.168.1.2 e 192.168.1.5 e cache arp

Ping tra 192.168.1.3 e 192.168.1.6 e cache arp

Ping tra 192.168.1.4 e 192.168.1.7 e cache arp
